Benefits of LiveCode:

English Like Language, fast software development time and testing.

HIV and Your Heart App

Introduction

Launched in 2000 - Left Brain Media™ is a creative media group that currently specializes in four related services:

1. Custom eLearning
2. Creative Video Production
3. Dynamic Websites
4. Web, Flash, and iPhone Application Development

Left-brain media was commissioned by the American Heart Foundation to develop an App which provided information on HIV and your Heart. The purpose of the App is to teach people about HIV and Cardiovascular Disease and track essential health goals with the interactive wellness checklist.

Customer Reviews:

This App has a 5 Star rating on the Apple App Store

What customers say

by markotaggart:

This app is really impressive with it's resources, media-rich content, as well as it's well-roundedness of tracking various health attributes. The Track features are probably the most personally impressive as it's not just T-Cells as I sorta thought it would be. AHA and AAHIV go the extra miles of covering many attributes for helping to improve heart-health and overall health being.

by Brown eyes too Very:

Useful I like this app. I use it to educate people in a regular basis. The videos are very helpful. I also use the health tracking app on a monthly basis... and when I am talking with my doctor.

About RunRev

Founded in 1997, RunRev is a technology company committed to making scalable software development fun, easy and accessible to everyone. To achieve this RunRev has created LiveCode.

About LiveCode

LiveCode is an award winning, high level, cross platform, integrated development environment. Its compile free work flow and highly efficient single code base enables Apps to be developed on Windows, Mac and Linux and deployed on all popular platforms including Mobile, Desktop, Cloud and Server. LiveCode is used around the world by organizations of all sizes to solve real world business problems.

Today millions of people use Apps built using LiveCode.
